- Used by Schools, Teachers & Parents Worldwide
- Fulfills *Core Curriculum* Requirements

WHAT IS EARTHSCHOOLING?

Earthschooling is a secular Waldorf curriculum that is a complete but flexible educational curriculum based on learning from nature, real-life experience, natural rhythms, hands-on activities, storytelling, painting and handwork with natural fibers. Earthschooling uses the Waldorf curriculum as a framework and thus it includes lesson plans, instructional videos, and core curriculum created by certified Waldorf teachers and fulfills all the requirements of a Waldorf education. However, Earthschooling goes beyond what other Waldorf curriculum providers offer by including curriculum correspondence with core standards for your location as well as a full range of teacher support tutorials including Eurythmy lessons. In addition, a certified Waldorf teacher is available online weekly to reply to member questions

Complete curriculum packages, teacher support, music, videos, mp3s, discussion forums, webinars, training, consulting & enrichment for teachers, parents

OTHER BENEFITS OF EARTHSCHOOLING

- **Administrative Support:** We provide charts and information on how our curriculum aligns with the core curriculum requirements of your state or country. We can also provide your child with a transcript and graduation certificate for each grade. We have certified teachers on staff that you can consult with.
- **Support for Diverse Cultures & Locations:** Earthschooling provides enrichment lessons for different languages, cultures and religions. We even provide alternate stories for members who want to replace lesson blocks in the curriculum. We also provide support for our Southern Hemisphere members and members in other areas of the world that do not experience the four seasons the way they are experienced in the "Western World".
- **Parent Support:** If you are running an early childhood program, school or enrichment program we offer over 32 different handouts (which can also be printed as a complete packet) for your parents to help educate them about the style of learning their child will experience with our curriculum.

BENEFITS OF EARTHSCHOOLING

Earthschooling is a well-established curriculum provider & was the first Waldorf-inspired curriculum to offer *online* lesson blocks. It is currently the *only* Waldorf curriculum to offer eurythmy lessons as well as extensive teacher training & support on a wide range of topics including watercolor, handwork, chalk drawing & block crayons.

FLEXIBILITY IN STYLE

We have made it easy for members to mix-and-match lessons, mix-and-match styles of education. We embrace all members from Waldorf parents/teachers to Montessori parents/teachers to unschoolers. Although Earthschooling was originally designed as a Waldorf homeschooling curriculum it has expanded and is now being used by many public, Montessori & Waldorf schools world-wide.

A REAL CONNECTION WITH NATURE

We go beyond the 'nature walks' and 'natural materials' and show you how to bring as much nature into your classroom as possible through weekly nature walk themes (for early childhood), herbal identification (for the middle grades), wildlife tracking and bald eagle monitoring for the older kids and so much more. Earthschooling truly guides you in making the earth your classroom. Our teachers and staff include herbalists, ecologists, and wildlife biologists. -

POSITIVE COMMUNITY SUPPORT

No matter what style of education you use you will find a positive support network with other members and ideas about how to find your own unique educational style. Our discussions are always focused on sharing ideas and positive support. Our members and staff will not reprimand you for what you "should be doing".

REAL LIFE SOLUTIONS

We realize that some children are transferring into our program from a public school or another system of education. We also realize that you may be teaching multiple children at the same time. We help you balance all your students' unique requirements, create a schedule that fits those needs, and realize that not all students fit into a stereotypical pattern.
