Welcome to Earthschooling

Curriculum Package

Welcome!

We are so happy to welcome you as a new member of the Earthschooling Community! Please take some time to carefully read this welcome letter, as it will be your guide for the entirety of your journey.

We have built this program with the intention of having you use the curriculum one monthly Planner Block at a time so you can benefit from all the extra videos, guides, notes, and resources on those individual pages. We do not advise downloading the year all at once unless you want to use it as a reference document.

Getting Started

The most important thing to do before you start using the curriculum is to download the Essential Guide and the Getting Started document at the top of your curriculum page.

After you download and read those documents, you can get started! You can download the entire year to use as a reference. However, you need to use the curriculum from each Planner Block page to ensure you have all the extra videos, MP3s, images, and other extras that come with your curriculum.

All the curriculum and extra support pages you have access to will automatically show up on your curriculum pages. These are all optional, so you can browse them in your own time. Your teacher support videos can be accessed by scrolling down to the bottom of your curriculum page (your grade). There is an icon on that page that says "Teacher Support."

"IF YOU ONLY DOWNLOAD BY THE YEAR AND DO NOT USE YOUR CURRICULUM BY THE MONTH, YOU WILL BE MISSING IMPORTANT ELEMENTS OF THE CURRICULUM"

EARTHSCHOOLING GUIDELINES

To read more about the agreement we have with you, please visit: ESMemberContract.com. Below, you can find a few of the most important guidelines from that contract.

___ I understand that I cannot share my Earthschooling materials. Earthschooling pays its teachers for content and pays the website hosting companies, so sharing content takes money away from the staff and teachers that create the curriculum and support you.

____ I understand that I cannot re-sell my Earthschooling materials (see item above). This is illegal.

____ I confirm that I am the person (or I am with the school) who originally purchased these materials. This account was not sold to me, passed on to me, or shared with me by the original account owner.

LIVE SUPPORT

All the free support and community connections that come with your curriculum package are asynchronous. To receive live support and interact with other members during monthly Zoom calls, please join the Educators' Forum at www.EarthschoolingForum.com

WHAT IS INCLUDED IN MY PURCHASE?

Every member receives access to free services we pay our staff to maintain for you. You can read more about how the cost of your curriculum is calculated on this page HERE. Because we offer **lifetime access** to all of our curricula and cannot predict how many requests each account will need for some services, the following services are not included in the cost of your curriculum, as they require us to pay teachers and/or staff members additional hourly fees for the creation or maintenance of these items. Click HERE to see that list.
